SUMMARY

4th-year B.Tech CSE student specializing in Artificial Intelligence and Machine Learning with a 9.05 CGPA. Hands-on experience in Python, SQL, machine learning, data analysis, data preprocessing, exploratory data analysis (EDA), feature engineering, predictive modeling, and data visualization. Developed data-driven applications using Pandas, NumPy, Scikit-learn, Flask, and Streamlit.

EDUCATION

SRM Institute of Science and Technology, Ramapuram, Chennai, TN *2023 – 2027*
B.Tech in Computer Science and Engineering – Artificial Intelligence & Machine Learning **CGPA: 9.05**

NRI Junior College, Palakaluru, Guntur *2021 – 2023*
XII – MPC **94.7%**

Narayana, Markapur, Prakasam *2021*
X **99%**

TECHNICAL SKILLS

Programming: Python, Java, MYSQL
Machine Learning: Supervised Learning, Classification, Regression, Random Forest, Decision Tree, K-Nearest Neighbors (KNN), Logistic Regression, Linear Regression, Feature Engineering, Model Training, Model Evaluation
Data Science: Pandas, NumPy, Data Analysis, Data Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis, Data Visualization, Predictive Modeling
Frameworks & Libraries: Scikit-learn, Flask, Streamlit, Matplotlib
Databases: MySQL, SQLAlchemy
Web Technologies: HTML, CSS , PowerBI
Tools: Git, GitHub, VS Code

PROJECTS

Road Condition Monitoring & Severity Classification *Python, Scikit-learn, Random Forest, Streamlit*

- Developed a Random Forest classification model for road-condition severity prediction using data preprocessing, feature engineering, model training, and model evaluation.
- Built an interactive Streamlit dashboard for data visualization and analysis of road conditions and severity classifications.

Retail Inventory Management & Demand Forecasting *Python, Pandas, Scikit-learn, Flask, MySQL,Power BI*
GitHub Repo

- Analyzed retail sales and inventory data using Pandas to identify product demand, sales patterns, inventory trends, and stock levels.
- Applied EDA, predictive modeling, demand forecasting, and ABC analysis to support inventory prioritization, stock monitoring, and data-driven decision-making.

Student Mental Healthcare System *Python, Flask, HTML, CSS, JavaScript, SQLAlchemy, MySQL*
GitHub Repo

- Developed a Flask web application for assessing student stress across academic, personal/emotional, and health/sleep dimensions.
- Implemented authentication, CAPTCHA validation, email verification, session management, automated stress scoring, and MySQL database integration using SQLAlchemy.

‘‘

RESEARCH & PUBLICATIONS

- **Implementation of an Online Interactive System Accessing Student Stress Level** – *International Research Journal on Advanced Engineering and Management (IRJAEM), 2026.*
- **Intelligent Gig Recommendation and Opportunity Identification using NLP** – *Accepted for presentation at the 17th International Conference on Sustainable Innovations in Engineering (ICSIE 2026).*

CERTIFICATIONS

- **Deloitte Technology Job Simulation – Generative AI & Development** – Feb 2026
- **GenAI Powered Data Analytics Job Simulation – TATA (Forage)** – Feb 2026
- **Digital Skills: Artificial Intelligence – Accenture (FutureLearn)** – Mar 2026
- **Introduction to Data Science Job Simulation – Forage** – Apr 2026
- **AI Fundamentals – Cisco Networking Academy** – Feb 2026

ACHIEVEMENTS & LEADERSHIP

- **Finalist – AI Domain Hackathon**, SRM Institute of Science and Technology, Mar 2026.
- **Student Coordinator – NSS**, SRM Institute of Science and Technology, Feb 2024.
